Latinx Reflection

Where Gaming and Community Change Lives

Long Beach, California - June 20, 2020 - Latinx pride shines through at the **Latinx Games Festival Retrospective**. Please join us on June 20, 2020 at 10:00 AM PST for an hour-long event taking place on the Latinx Games Festival Twitch channel. Join us as we reflect on the first Latinx Games Festival (LXGF) and pull the curtain on everything that we have in store this year! If you are looking to learn what it takes to begin a career and thrive in the video game industry, then this is an event for you! Join us as we reflect on the 1st ever Annual Latinx Games Festival.

“Being able to talk to and network with the best and brightest Latinx game industry professionals and community members was truly an eye-opening experience for me,” said Jason Vega. “I’ve never been to a conference which directly contributed to my growth in this profession, other events should take note!”

This informative kickoff event will provide insight to everything the Latinx Games Festival has in store with collaborations that we cannot wait to share with you. This retrospective event will be the first of *many* future online events. Keep an eye on our social media channels for future announcements.

“LXGF was an outright motivational and empowering event,” said Jonathan Morales. “The ability to meet equally passionate Latinx developers from around the world and from different facets of the industry is what will push the core of the game industry forward as well as the careers of all Latinx developers.”

###

Latinx Games Festival is the definitive video game industry event for Latinx game development, and provides the Latinx game development community a platform for global opportunities. Highlighting Latinx industry professionals on panels and Q&A's on our livestream will show the world that we're already here, and what skills and tools are needed to exist and thrive in this industry. Showcasing an Arcade of Latinx produced games curated locally and around the world will lead to a richer, more mature video game industry and one that positively impacts the future of Latinx game development. We aim to cover a range of topics not only important to Latinx game developers, but the video game industry as a whole.
